Subject: Free satellite data Posted by d.poreh on Tue, 19 Jan 2010 12:24:54 GMT View Forum Message <> Reply to Message

Folks

Hi;

I used to take free satellite data like: Landsat, SRTM, Modis,.... From this web site: http://glcfapp.umiacs.umd.edu:8080/esdi/. Unfortunately it is not working for few days. Does anyone have any idea for other fee data websites?

Any help highly would be appreciated

Dave

P.S. I need some elevation and optic data from southwest of Italy (Sicily area).
