Subject: Elevation data

Posted by d.poreh on Mon, 25 Jan 2010 13:13:51 GMT

Folks
Hi;
I have an elevation data (elevation.dat), which has lat-long and
elevation information. I want to save this file as a .tiff image and
doing some surface, shade_surf, and… presentations.
Could someone give me some tiny help for doing that?
Any help highly appreciated
Cheers
Dave
