Hi PP,

Thanks for the prompt response. I had already tried what you suggested. When I do so I get a very strange result. The top half is completely black and the bottom half has the plot repeated three times (still using just one of the color tables).

```
-----  
|      |  
| BLACK |  
|      |  
-----  
|      |  
| P1 P1 P1 |  
|      |  
-----
```

Any thoughts?

Thanks,
Mark
