Yes, each project has its own svn/Trac.

  svn URL is http://svn.idldev.com/${PROJECT}
  Trac site is http://${PROJECT}.idldev.com

where ${PROJECT} is:

  idldoc
  mgunit
  cmdline_tools
  dist_tools
  ridl

My regular library doesn't have a Trac site, but the svn URL is:

  http://svn.idldev.com/idllib

I should probably bring that one into line with the others.
