I could put them in a tarball for you, but I have to ask
myself, "Why am I doing all the work around here!?"

I'm going to talk to Mike Galloy at this week's IDL
User's Group meeting. He has a nice Subversion solution
for me if I would just get off my duff and use it. It
involves learning something new, which I am REALLY
loath to do. :-)

Cheers,

David

P.S. Anyway, don't download them yet. I just finished my
presentation preparation and I have a slew of new programs
to upload, including a new one for the NCDF_Tools.zip file. ;-)
