Subject: to read and to save multiple fits format files at a time
Posted by sid on Thu, 04 Mar 2010 12:41:56 GMT

HI,
   My data is in fits format, I am having 22 fits file and all the 22
files should be subtracted by single fits file individually, and I
should save it separately after subtraction. So please help me how to
read all these 22 files at a single stretch and subtract all the 22
files separately with one fits file and save the subtracted ones.
regards
sid
