Subject: Re: How to read data with format codes? Posted by Adam Solomon on Sun, 14 Mar 2010 00:39:41 GMT View Forum Message <> Reply to Message

Ah, I've found another problem with this: it doesn't read the first character (at least sometimes) in the third column, so if that column has a value of 1.0234, it'll return 0.0234.
