Maybe this works:

```
Help, Calls=callStack
thispath = strmid(((str=strmid(((c=callstack[0])),((start=strpos(c,'<')
+1)),$ 
    strpos(c,(')-start))),0,strpos(str,FILE_basename $ 
        (strmid(c,((start=strpos(c,'<')
+1)),strpos(c,(')-start))))
```

Cheers,

CR
