
Subject: Calculating the Exponential using IDL

Dear All,

Please I am an IDL new user and I have the following question:

I need to Calculate the exponential for very small numbers in IDL but the results is always zero. For example:

In IDL $\text{EXP}(-700) = 0$, while in MATLAB the answer is $\text{EXP}(-700) = 9.8597\text{e-}305$. I need IDL to give me the same answer as MATLAB but I do not know what to do.

Please, any help is appreciated!

MD
