> Is there a particular reason not to use imap?

I see two reasons:

- I didn't know that tool (newbie on IDL), I'm going to try
- I would like something automatic : one click, files are loaded, data printed

> Get the hell out of a 16-bit display!! :-)

You're right, I've set it 24-bit, the TVREAD works very well !!

Now I've got good PNG, thank you David. Any Idea about the Postscript very crude resolution ?
