I was mostly thinking this was not a productive use of
my time because I can't believe that something this recent
in the library is not vectorized. LL_ARC_DISTANCE dates
back to 1992, but the earliest date in MAP_2POINTS is 2000.

Since the source code contains the usual ITTVIS copyright
notices, I feel compelled to ask them for permission before
posting my modified versions. I will do so if they give me
permission.
