Subject: DEM Generation
Posted by Muhammad on Wed, 21 Apr 2010 10:33:30 GMT

Hello:
I want to create DEM out of SPOT 5 Stereo pairs. The images are
covered with snow on mountaintops which makes it difficult for me to
take GCPs. When I try to resize the stereopairs to avoid mountaintops,
I am asked to enter the RPC file. Would anyone help me out how to deal
with it.
Regards,
Arshad
