Hi,

My data is in fits format. The is of 1024 * 1024 array. The counts vary from 5000 to 6000 and I know that 5500 counts is there in my data, but I need to know at which pixel this 5500 counts occur exactly, without displaying the image, because I need to do this for several files. So each time I can't display and check for the pixel position. please helpout in this regard.

regards

sid
