Hi Lorenzo,

`out_lib` is the problem here. You can't specify the data in this function (you could be using `writeu` directly though). Moreover, you use the `fid` of your original file. I believe you must get a `fid` for your output (i.e. have `out_lib` as an Envi image, loaded in memory), and `envi_output_to_external_format` will convert this data to `ascii`.

Jean
