hi everyone,

In 2d plot the ticknames, and x- and y-axis are written vertical. But in 3d plot, they are rotated according to the ax and az values (default=+30 deg). For example,

```
window,0,xs=600,ys=500  
surface,dist(200),charsize=3,xtitle='x-axis',ytit='y-axis'
```

I wish to rotate the ticknames, and x- and y-titles to vertical direction in a 3d plot. Some such examples can be found on web page :

<http://soft.proindependent.com/doc/manual-en/x1376.html>

Thanks  
RAM
