Ok, after having now run lmread (unsuccessfully) I am now getting the following, different error message:

LICENSE MANAGER: Cannot connect to license server system.

The license server manager (lmgrd) has not been started yet, the wrong port@host or license file is being used, or the port or hostname in the license file has been changed.

Feature: idl

Server name: lm1.license.[my school].EDU

License path: /usr/local/itt/idl70/./license/license.dat:/usr/

local/itt/

icense/*.lic:

FLEXnet Licensing error:-15,570. System Error: 115 "Operation now in progress"

For further information, refer to the FLEXnet Licensing End User Guide,

available at "www.macrovision.com"..

License file: /usr/local/itt/idl70/./license/license.dat:/usr/local/

itt/li

cense/*.lic

How exactly do I correct this?

Thanks!
