Subject: Program caused arithmetic error: Floating illegal operand   ; while using MPFIT
Posted by pp on Mon, 07 Jun 2010 01:18:35 GMT

Hi All,

I am using MPFIT to solve a problem and I get this error : Program
caused arithmetic error: Floating illegal operand.
The value of my key STATUS is 4, NPRINT = 1, ERRMSG = is an empty
string.
Also the program returns the same value of parameters which were used
as the starting parameters.

STATUS = 4 indicates a success so can I be sure that the program is
doing the right thing.
