Not only has David been "supplying color information to the
IDL community for nearly 25 years", but he's also written FSC_COLOR,
it's like sliced bread only better. And that's a fact!

```
plot, indgen(9), background=fsc_color('white'),  
color=fsc_color('black')
```

Get it here http://www.dfanning.com/documents/programs.html#FSC_COLOR
