Not only has David been "supplying color information to the IDL community for nearly 25 years", but he's also written FSC\_COLOR, it's like sliced bread only better. And that's a fact!

```
plot, indgen(9), background=fsc_color('white'),  
color=fsc_color('black')
```

Get it here [http://www.dfanning.com/documents/programs.html#FSC\\_COLOR](http://www.dfanning.com/documents/programs.html#FSC_COLOR)
