Subject: Batch ENVI Resize Data (Spatial/Spectral)
Posted by titan on Fri, 04 Jun 2010 09:41:50 GMT

Hy everybody,
I'm trying to resize an ENVI image insinde a procedure. I know that in
the main bar there is the Resize Data (Spatial/resize) tab and I
thought that the routine ENVI_RESIZE did the same but it seems not..
does Anybody knows that if there is some way to do it?

I tried resizing the intial image extracting a sub-matrix but the
result is not the same..

thank you
