Ah! I'm planning a long, 500 mile hike later this summer.
A hike I first did 40 years ago this summer that changed
my life in many ways. I think about this hike (and my life)
a lot these days. This morning on the way to work a song
came on the radio that made me sad. I was thinking about
that on the way back from getting my coffee this morning.
I think I'm sad about roads not taken and now closed off
on any possible way forward.

All this to just say, I feel your pain. :-)

Cheers,

David
