Subject: contour plot query

Posted by Fster on Mon, 21 Jun 2010 14:45:29 GMT

Is it possible to plot the following:

I have an array [144, 144]

from this I am finding out which values are greater than or equal to
10

using

result = arr ge 10

This then produces a series a of 1s and 0s representing true and false
if I am correct?

I would then like to plot this as a contour plot just highlighting
across the grid which points are true and which are false.. can this
be done? as the results are in byte data type?
