What kinds of widget programs are you interested in? I have quite a few and I know a number of places where you can find more. For example, Ray Sterner and the folks at the Johns Hopkins Applied Physics Lab always have great IDL programs. They are accessible via anonymous ftp at [fermi.jhuapl.edu](ftp://fermi.jhuapl.edu) in the directory /pub/idl. The JHU/APL web page also has pointers to other IDL sites where software is available. It is at:

<http://fermi.jhuapl.edu/s1r/idl/idl.html>

There are a number of widget programs in the Research Systems training directory that do things like allow you to create resizable graphics windows, zoom into data, interactively configure your PostScript page, etc. They are available via anonymous ftp at [gateway.rsinc.com](ftp://gateway.rsinc.com) in the file /pub/training.

Let me know if you need additional information. (I tried to e-mail you, but my mailer couldn't find your domain).

Yours,

David
