Subject: Continuous colorbar

Posted by zhangyehui on Mon, 28 Jun 2010 14:35:53 GMT

Hi everyone,

I want to draw a contour map of correlation coefficients with
continuous color. As R varies between [-1, 1], I'd like those are
close to 0 shown in white color and those are close to 1(-1) with
darker colors. I usually use loadct colorbars. There are 41 colorbars.
But I can't find a colorbar with a white color in the middle. So I
just wondered if there is anyway I can do that. Thanks in advance.

Ally
