Subject: IDL and OPENDAP

Posted by Kenneth P. Bowman on Fri, 09 Jul 2010 18:48:57 GMT

Is anyone using IDL and OPENDAP to access netCDF and HDF files?
Can you write as well as read files?

I see that there is an OPENDAP IDL client, but I can't find any
actual examples of how it is used. I am concerned that server
installation and configuration may be complex. It appears
that the server software might have complex dependencies.

Comments welcome.

Thanks, Ken Bowman
