My student Lea has prepared packages for Ubuntu 9.10 and 10.04 x386
(now without HDF5 and NetCDF, but I will upgrade ASAP)
based on current CVS version (GDL 0.9rc4 + CVS)

http://aramis.obspm.fr/~coulais/IDL_et_GDL/Ubuntu/Packaging-Download_pageEN.html

files *.pro should be in /usr/share/gnudatalangage/lib
and please put this dir. in your GDL_PATH

Please report any problems, suggestions ...

With best regards

Alain
