Yes, it should be possible. I will asked Lea to prepare it.

And I will inform here when it will be ready.

Is they any wish for a 9.04 package ?

Since it is the first time we prepare a package,  
despite we made large tests (and all seems to be OK on our side),  
our big concern is if \*you\* can use it ... Then please report success  
and any problem (here on newsgroup or directly by email or on the  
source forge page).

Alain and Lea.
