Hi guys,

I already tried to use these libearies but I have a problem when i try to load the DLMs. I get the following error:

```
% DLM_LOAD: Error loading sharable executable.  
      Symbol: IDL_Load, File = C:\Archivos de programa\ITT  
IDL70\bin\bin.x86\idl_tools.dll
```

The application can not be applied because the configuration is wrong.
Reinstall the application can solve the problem.

I'm using IDL 7.0 !
Suggestions ? Thank you in advance,

bernat
