amd64 packets are now available, same page
 http://aramis.obspm.fr/~coulais/IDL_et_GDL/Ubuntu/Packaging- Download_pageEN.html

packets now include NetCDF and HDF5.

bug related to X11 should be solved --> please upgrade i386 ...

We also change the name, following Ubuntu convention ...

Please remember these packets are based on current CVS version ...
(we hope to provide a rc5 in August)

Please report any problems.

Alain and Lea
