What do you think it would take to get the Help system to
open itself in the Index tab? An act of Congress? A complete
boycott of IDL? Sheesh!

Cheers,

David

P.S. Alright, I understand the marketing decisions that might
cause you to want the Help system to open up on its very front
page when you first open it up. But couldn't we at least figure
out a way that the Help system opened up in the last tab you
were in before you closed it? Heck, I would be happy if it just
did this is the current IDL session! This is one of those things
that just cause me to shake my head. :-(
