one more quirk. the full plot code I use is

```
plt=plot(loc,hist,/
histogram,xrange=[0,100],yrange=[0,0.2],color='black',linestyle='solid',thick=2.5,$
    xtitle='AC
Count',ytitle='N',title=region_a[i],axis_style=1,margin=[0.1 5,0.15,0.15,0.15])
    axs=axis('Y',location=[100,0],title='Cum.
Probability',color='red',tickdir=0,textpos=1)
    axs.yrange=[0,1]
```

As soon as I set the axis range, the title set in plt call moves to 0.2 in the middle of the plot. grrrrr.

H
