Subject: Correlation between bands using IDL
Posted by Lavanya on Tue, 03 Aug 2010 09:30:08 GMT

Hi,

I am pretty much new in using IDL. I have been trying to read
multiband image data using envi_select and envi_file_query, where i
get the information about the data im using.
Now how could i find the correlation between any two bands (here the
number of bands i have is 242)
Finally i need to generate a output correlation matrix of 242 * 242.
Please help me how can i go about.

Thanks
