Hello,

I am trying to plot multiple groups of data points (along with error bars) in one plot. When I try to use plot (for first group), oploterror (for the error bars for first group), then oplot (for next group), then oploterror (for error bars for next group), the data are plotted but the vertical error bars fail to show up.. I wonder what I'm doing wrong.

; First group

```
plot, A3, A0, psym=6  
oploterror, A3, A0, A6, A4, psym=3,errstyle =1, /HIBAR  
oploterror, A3, A0, A7, A4, psym=3,errstyle =1, /LOBAR
```

; Second group

```
oplot,A3, A1,psym =2  
oploterror, A3, A1, A6, A5, psym=3,errstyle =1, /HIBAR  
oploterror, A3, A1, A7, A5, psym=3,errstyle =1, /LOBAR
```

where An is an array of data elements

Thank you
