Can someone explain me the columns in the output of
IDL> profiler, /report

I am not sure I understand the columns "Only" and "Time". Obviously,
'Only' lists the time spent *only* in that particular routine. But
then adding all those up wouldn't give the total time spent in running
the code. Yet, "Time" lists time which seems closer to actual time
spent in running the code.

I guess, I am more anxious about times in 'Only' not adding up to
total time spent on the code.
