When creating IDL\_IDLBridge object, I get the following error message:

% Unable to start IDL\_IDLBRIDGE slave process.

I am using IDL8 and Windows 64 bits

```
{ x86_64 Win32 Windows Microsoft Windows 8.0 Jun 17 2010  
64    64}
```

Same code shows no error under IDL7.1 and Windows 32 bits.

What happens ?

alx.
