Hello gurus,

Do you know if there is a way to add IDL to a current eclipse installation ?

I found an article from David Fanning doing weird things and I didn't succeed.

<http://www.dfanning.com/workbench/addtoeclipse.html>

It's very disappointing to have 2 different installations of eclipse, one for Java, C, C++, PHP, etc and another one for IDL. :____

I don't have IDL 8 yet T_T so I would use the jar plugins for IDL 7.1

Well, thank you in advance !

nata
