Hi folks,

I am trying to use "hist_norm.pro" in a code like that (my first time):

```
pro istog, howmanyt
```

```
  t = fltarr(howmanyt)
```

```
  N = 20.
```

```
  for k=0, howmanyt-1, 1 do begin
```

```
    t[k] = total(randomu(seed, N))
```

```
  endfor
```

```
  a = intarr(howmanyt) + 1
```

```
  hist_norm, t, condition = a
```

```
end
```

I can't figure out why it does not work. Can you help me?

Thanks in advance.
