Folks,

OK, !P.Multi is just broken in IDL 8.0.1, the new patch.

I just started IDL up, and here are the commands I typed at the IDL command line:

```
IDL> data = Long(LoadData(1))
IDL> data[40:49] = 999
IDL> !p.multi=[0,1,2]
IDL> plot, data
IDL> plot, data, max_value=100
```

Here is the graphic that resulted from these commands:

This is a BIG problem for me. :-(

Cheers,

David
