Try this...our key procedures have a 'dst' prefix in their names to
make it work..functions that are referred to inside those procedures
are resolved even those without the dst prefix.

```
;+
; Build script for Decision Support Tool (DST)
;-

.full

sourceFiles = FILE_SEARCH('dst*.pro')

sourceFiles = FILE_BASENAME(sourceFiles, '.pro')

nFiles = N_ELEMENTS(sourceFiles)

FOR iFile = 0, nFiles-1 DO RESOLVE_ROUTINE, sourceFiles[iFile], /
Either, /Compile_full_file

RESOLVE_ALL

SAVE, /ROUTINES, /Compress, FILENAME='dst.sav'
```
