
Subject: NG Colorbar in IDL 8.0.1

Hi all,

Can anyone think of a reason why a colorbar would completely fail to appear in a NG window? I adapted the example from the IDL help for positioning, so one would assume that wasn't the issue...

```
IDL> i1 = image(fwhm,title='FWHM  
(px)',rgb_table=4,position=[0.25,0.05,0.95,0.9])  
IDL> c1 =  
colorbar(target=i1,orientation=1,position=[0.05,0.22,0.29,0. 9])
```

I get the image, offset to the side, and no colorbar.

Thanks!
