
Subject: Ending a code listing section with IDLdoc

Dear all,

Probably this have been asked and solved many times but I could not find the info...

In my file header I want to write a "code formatted section" using markups like this:

```
;   The structure is defined as::  
;  
;  
;   {ABS_Date,  
;   year:    OL,    Gregorian year  
;   ...  
;   }  
;  
;
```

And then I would like to write some standard text again without formatting.

How do I do that? Skipping lines or removing the indentation did not work.

Thanks in advance, and thanks to IDLdoc which is **right now** revolutionizing the way I document my code

Fab
