Ok, this is a temporary solution.
I would like to have the right way to do it, in case I want to write
more formulas in the future.

I tried to do the same as the example of the documentation but I
didn't succeed.
rhs = '!8!S!Af(x!S!Ii!R) - f(x!S!Ij!R)!R!B x!S!Ii!R - x!S!Ij!R !X'

It seems that I cannot use 2 !S successively (one "inside" the other !
S ... !S ... !R ... !R)
Thank you David,

nata
