Subject: updating the coyote library

Coyote IDL routines, written by D. Fanning, are very important routines for IDL users. I think all the idl user community appreciate this.

To get updates of these routines, we download the Coyote library every time. Is there any automated way to update the coyote library using an IDL code similar to solarsoft (http://www.lmsal.com/solarsoft/ sswdoc/index_menu.html)?

I think, it may be possible using a IDL code. But I don't know how to write such a useful code which compare the old routines available on my "coyote_lib_loc" and new routines available on web in the "coyote_lib_web".

Cheers
RAM
