Dear GDL users

We are on the path of delivering a 0.9.1 release, due in the beginning of 2011.

Please, based on ****current CVS version****, report bugs, problems, wishes.

The best way is to submit bug(s) reports on
http://sourceforge.net/tracker/?group_id=97659&atid=6186 83
(with sample of codes when needed.)

But I am still accept direct messages.

With best regards.

Alain

PS: we still provide assistance for compilation from scratch. You have now two ways
for compiling from scratch: "configure" and "cmake".
