Thanks David for this quick answer and it help me a lot!

I used for all my graphics this kind of formatting in order to manage it well :

```
!p.font=0 ;use postscript fonts
set_plot, 'ps'
ext='.eps'
device, xsize=6, ysize=6 ;SQUARE one panel, one column figure
cs=1 ;character size
!p.thick=3 ;data
!x.thick=2 ;x axis
!y.thick=2 ;y axis
!y.minor=5
device, filename='ENSO'+ext, encapsulated=eps, $
    /helvetica,/isolatin1, xsize=9, ysize=4,font_size=6, landscape=0,
color=1
```

Is there a way to do the same with your commands ?

Also, is there a way to change the range of the contour (and colorbar) to highlight the high values of data ?

Cheers
