Hi all,

How do I add a secondary axis to a plot in new graphics (i.e. like this in direct graphics:

[http://www.dfanning.com/tips/another\\_yaxis.html](http://www.dfanning.com/tips/another_yaxis.html))?

This is as far as I got:

```
x = FINDGEN(100)
```

```
theta = x/5
```

```
curve = SIN(x/5) / EXP(x/50)
```

```
p=plot(x,curve)
```

```
p=plot(x,theta,/current,COLOR='ff00'xl,YCOLOR='ff00'xl,YTEXT POS=1,YLOG=1)
```

I want the second axis to be logarithmic and to the right-hand side of the plot. I also want to suppress the right Y-axis in the first plot and the left Y-axis in the second plot. Any ideas?
