Thanks to be concerned about my problem. I like to search also by myself and not to be dependent on your knowledge, even if it's really amazing :-)

By the way I tried the code you send above again but with 'TVImage, scaledData' and not 'TVImage, data' and I can see the picture I want...And it's really nicer than with matlab :-)

I think I am messing again with the contours I am trying to draw... I will try again, with the tips you sent me before and also with http://www.dfanning.com/tips/contour_hole.html

Also, I can sent you a copy of the data.

Will let you know

Cheers
