The problem is that I don't have the faintest idea what your problem is. I don't have any code to look at, I don't have any data. I'm just making more or less intelligent guesses from experience.

Have you looked at a histogram distribution of your data? Did anything suggest itself to you? Would you like to share that insight with us?

If MatLab does a good job of it, then I suppose whatever the problem is can be corrected. But, not by me, and not out of thin air. :-)

Cheers,

David
