Hi all,

I'm reading a file, i need to extract data and save into another  
file, but is coming with strange characters.  
I'm reading this file for example: <http://pastebin.com/ZLgMjrH3> and  
when i save characters appear. See: <http://pastebin.com/NbwKhqAw>

My code: <http://pastebin.com/kShggiSa>

I need to save in a format that is then recognized by JAVA.

Understood?
