Hi all,

I need to read and save a file using IDL, but my code is reading and saving only the first line. Please, see my code:

```
PRO READ_FILE
```

```
OpenR, lun, 'C:\Documents and Settings\Web\IDLWorkspace\Projeto_Estudo\dados.dat', /Get_lun
```

```
file = "
```

```
ReadF, lun, file
```

```
SAVE, FILENAME=('C:\Documents and Settings\Web\IDLWorkspace\Projeto_Estudo\teste1.dat')
```

```
;print,file
```

```
END
```
